Student Outcomes Assessment & Success Reports

Annual Reporting Guidelines for Academic Programs

Purpose

Annual Student Outcomes Assessment & Success Reports (SOASRs) are first and foremost tools for facilitating faculty reflection, planning, and documentation of efforts to ensure student learning and success. Regular engagement in and transparent reporting of this process also serves as assurance to students and stakeholders of our commitment to student learning and success, as well as an opportunity for strengthening assessment practices and the data they yield.

Regular assessment of student achievement of learning outcomes is an important indicator for faculty to gauge student progress through their academic programs. Unlike course grades, well-designed learning outcomes assessment provides more accurate insights into student mastery of the core intended outcomes of an academic degree program, and can inform faculty planning for success and continuous improvement.

Student learning is central to student success, but we know that success is influenced by many factors. Regular review of accepted measures, such as retention, persistence, and graduation rates provides useful reference points for evaluation of program goals and reflection on the valuable activities faculty engage in to support students and promote their success.

Instructions

- 1. The annual SOASR documents outcomes from the PRIOR academic year, as outlined in your program assessment plan. The report due this year reflects **AY 21-22**. You do not need to report on all program outcomes every year.
- 2. Include program faculty, at minimum, in the discussion of assessment results and actions to be taken based on findings, and preferably throughout the assessment process.
- 3. **NEW FOR 2022:** Complete either the **Table Format** (Option A) <u>OR</u> the **Narrative Format** (Option B) report based on what makes sense for your discipline. While both forms will include some narrative reflection and specific data reporting, feedback from faculty suggests this option makes reporting more useful.
- 4. If helpful, review the SOASR Rubric (separate attachment) that will be used to provide program faculty with feedback on their assessment practices to get a sense of what details would be useful to include in your report.

For programs currently undergoing accreditation review: It is recognized that accreditation review often meets or exceeds institutional evaluation standards. If you 1) report program student learning outcome data to your accreditor, 2) data from the current AY for the SOASR is included in your accreditation report, and 3) your report will be completed by the last day to submit the SOASR, you may request an alternate reporting format to streamline your efforts.

To accommodate demands on faculty time and programs undergoing accreditation or program review, SOASR will be accepted on a rolling basis.

Mean score was 97. 100 percent of students earned a 80% or better. (N=10)	Our department lost a faculty member and the data associated with the courses that that faculty taught.
	G5: Achieve mastery of the skills (including using appropriate tools) required in their discipline or profession.						

Student Success Activities

Use the "Academic Chair" tab in <u>Blue Reports</u> to view your program's data related to retention, persistence, time to/rates of graduation, etc., as applicable (undergraduate v. graduate). Share reflections and activities of program faculty in the table below. Consider curricular, pedagogical, advising, co-curricular, and student support efforts.

Describe current student success activities that are working well.	A. Case conceptualizations work well in the evaluation of student clinical case conceptualization progress, due to this being a data point throughout the clinical sequence.
	B. Our faculty are utilizing a Teams Report for data collection and that is working well. Teams allow us to collect data semester by semester and have been using this for three terms now. This is allowing for a timelier collection of data.
	C. Our students typically graduate on time within two years. Periodically we have a student take longer to complete the program due to outside work commitments. Some courses have a higher enrollment due to students working on dual licensure or transferring in for initial licensure.

	D. The Clinical Mental Health Counseling program is intensive in clinical practice and face-to-face work. Students are in practicums and internships throughout the Wabash Valley, local community, and surrounding areas such as Indianapolis and Paris Illinois.			
	E. During COVID the clinic expanded and increased its footprint in the Wabash Valley, due to being the only clinic willing to see clients face to face and offer telehealth throughout the pandemic.			
	F. As far as current success as demonstrated by enrollment numbers, degrees conferred and retention numbers for 2021-2022:			
	Clinical Mental Health Counseling Program Based on Summer Cohort Enrollment (Beginning of Program)			
	Statistic 2021 2022			
	Number of Applicants 30 54			
	Applicants Accepted 12 15			
	Number of Students Enrolled 11 12			
	Number of Graduates No data yet No data yet			
	Completion Rate No data yet No data yet			
	Job Placement Rate No data yet No data yet			
Based on Blue Reports data and review of current activities, what	A. COVID has changed the landscape of community counseling and has			
are the primary areas to focus on improving next year?	allowed us to expand our internship sites by increasing the number and variety of our placement sites.			
	B. We have more school-based opportunities than we have had in the			
	past. For next year we need to continue to cultivate those internship			
	opportunities for our students.			
f you don't have a Blue Reports account, you can request one using the web	page link, or your Department Chair, Associate Dean, or College Assessment Director can assist you			

If you don't have a Blue Reports account, you can request one using the webpage link, or your Department Chair, Associate Dean, or College Assessment Director can assist you.

Continuous Quality Improvement

Describe primary insights gained from analysis of findings. What was learned? What questions did it raise? How does current performance compare to past (if applicable), and how might any prior action plans have influenced performance?	A. Between our assessments and interviews with our sites and employers, we will continue to review the course offerings and content of courses to make sure our content is relevant to issues the counselors are likely. For example, we have decided to add to the rotating course content the supervision course for the CMHC students as we know they will likely be asked to provide supervision at some point in their careers.
	B. We have placed a higher emphasis on suicide prevention and intervention training in the course of the technique to better prepare our students for this growing societal issue.
	C. With the new DSM-5-TR, there is new information on the cultural context of diagnosis that has been a topic of discussion in the diagnosis course to better prepare our students to be competent in multicultural issues.
	D. We have improved our ability to host telehealth sessions in the CMHC program while maintaining the structure of the CMHC program as intensively in person.
	E. Moving forward students' knowledge will be improved on program evaluation as this was an additional piece added to the COUN 710 and students did not fully grasp that piece of the assignment. A rubric is being developed in collaboration with the adjunct who taught this course in the summer of 2022.
	F. A Teams folder has been created to gather data semester by semester moving forward. This will hopefully prevent data loss from happening in the future which was previously experienced when a faculty member resigned.
What findings-based actions are planned to maintain strong performance and/or improve student learning and success?	A. Our clinic is still using a paper-based medical record system while the industry standard has gone to electronic medical records. EMRS are expensive to purchase and maintain and given the financial concerns at ISU, it is not likely to be corrected in the coming year. Although this is an issue within the Grosjean clinic, when students go onto Internship and Advanced Internship they are gaining experience with EMRS that are being utilized at their placement sites.
	B. We will continue to work with our internship sites and Alumni employers to evaluate courses and course content for relevant changes that will better meet Indiana State

	community needs.
What learning outcomes will your assessment plan focus on next year, and what changes, if any, are planned to improve assessment strategies and yield stronger data?	A. KPI will continue to be evaluated and we will as a faculty continue our data collection in Teams.
	B. For our learning assessment the COUN 710 course will be re-evaluated to improve students' knowledge of program evaluation.
	C. All of our DATA points will have to be reassessed due to the loss of faculty.
	D. We will need to assess who will teach CMHC courses moving forward.
	E. Specifically, I would like to reassess the student learning outcomes addressed in this report next year to see whether or not changes that have been or will be implemented have been successful.
	COUN 635 and COUN 710 will be assessed to see whether or not the strategies such as clear rubrics, vignettes, and earlier introductions to theory conceptualization will make a difference in student learning outcomes throughout the student's program of study specifically in COUN 633, COUN 634, COUN 739 and COUN 740.
Describe faculty involvement in this assessment, and how will findings be shared with faculty/stakeholders (as applicable)?	A. Each faculty will be responsible for collecting key data points in their classes.
	B. That data is shared in Teams and through area meetings on a bi-weekly basis.
	C. Data is shared with outside stakeholders through the program website and ISU Assessment website.
	D. We also share our accreditation report each report on our program website.
	E. Historically we have had an advisory board and are in the process of redeveloping that resource.

What findings-based actions are planned to maintain strong performance and/or improve student learning and success?

What learning outcomes will your assessment plan focus on next year, and what changes, if any, are planned to improve assessment strategies and yield stronger data?

Describe faculty involvement in this assessment, and how will findings be shared with faculty/stakeholders (as applicable)?

Student Outcomes Assessment & Success Report Evaluation AY 21-22

Program: MS Clinical Mental Health Counseling **Evaluation:** Mature

The purpose of SOAS Report evaluation is to promote high quality academic program assessment that results in relevant, useful, and accurate data about student learning outcome achievement that faculty can use in planning for and monitoring efforts toward continuous improvement. Faculty are encouraged to incorporate feedback they find useful into assessment practices, and resources are available to support assessment development.

Evaluation Key: Exemplary=Meets all standards, exceeds some; Mature=Meets all/most standards, no serious concerns; Developing=Meets some standards, multiple recommendations for improvement; Undeveloped=Meets few/no standards, serious concerns noted; Cannot Evaluate=Missing information prevents evaluation

Component of	Areas of Exemplary Practice	Standards of Practice	Recommendations for	Evaluation
