

Indiana State University is officially (and finally) making a complete move to Maple TA as our math placement test for all students. To date, we have continued to use COMPASS for continuing and returning students. However, beginning on October 15, any student who requires math placement testing will be directed to take the Maple TA test.

Questions students may have:

**When should I take this new test?**

New students will continue to be asked to complete Maple TA during the spring and summer before attending Orientation. Those students who have not done so will complete the test during Orientation.

Continuing and returning students who need to take the math placement test should be directed to the University Testing website. Students should click on "placement testing" and follow the instructions for the math placement test. They will be directed to take a practice test first before proceeding to the actual test. They may take the practice test as many times as they'd like. It is preferred that students take the actual test only once. However, in exceptional cases when the student believes that their test score does not represent their true ability, they will be allowed to take the test again.

**Who do I call if I have problems taking the test?**

If students experience difficulty in navigating the website or in taking the test, they should contact the University Testing Office at X7666.

**What course will I be placed in based on my test scores?**

Interpretation of Maple TA scores:

Scores of 0-3 = Math 010

Scores of 4-6 = Math 011

Scores of 7-11 = Math 102 or Math 111

Scores of 12-20 = Math 112 or Math 115

Scores of 21-30 = Math 122 or Math 131
