

Unsecured access for users with:
Operating System- Microsoft Windows 7
Adapter type- Integrated wireless adapter.

1). Right click on the **wireless network icon** in the system tray and select **Open Network and Sharing Center** to see the following screen.

2). Click on the Connect or disconnect link indicated to see the available wireless networks screen. Select ISU-OIT NWEF and click on Connect.

3) To view the connection status, look in the system tray. The bars lit in white show the strength of the signal for your connection.
