

SAC: Notebook Initiative

During the recent SAC meeting [November 11], we discussed briefly the Notebook Initiative. The Chair having initiated this topic during the October meeting, we have since received information from Faculty Senate. At the Nov 11 meeting, we were informed that a large number of entities are looking at this initiative and producing various lists of questions, recommendations, etc. Rather than contribute to the growing documentation at this point, and with the indication that there is a short turnaround time to give more detailed input at this 'are we interested in pursuing' point, SAC decided to move:

SAC supports the development of the Notebook Initiative policy and that, if the Initiative goes forward, representatives from SAC be included in the implementation.
