

Year in Review

Action Steps

In light of the new [strategic direction](#) of the University can you modify your action steps or develop new action steps that will aid in the implementation of the University's Strategic Indicators?

—
Do you have any further progress you would like to report?

1. We continue to add to the Website. We added the Immunization and Health History form this year to the website. We also made it easy for individuals to download the adobe needed to get the forms.
2. The Student Health Center believes that educational information is as important as the diagnosis and treatment of students. We offer a wide variety of literature to students and offer materials every visit.
3. The TB Clinic is very proactive in keeping students free of the TB disease. We monitor, educate and promote prevention to students. The ISDH mandates all international students be tested and treated for latent tuberculosis infection.
4. The Clinic continues to provide CPR/AED certification and re-education to departments on campus. This allows ISU to have defibrillators all over the campus in order to help save lives.
