

Elanco Animal Health – Clinton Laboratories

Kim Gleason and Amy VandeVelde

Elanco provides a comprehensive array of products and knowledge services to improve animal health and food animal production in more than 90 countries around the world. We value innovation, both in scientific research and daily operations. Through our 8,500+ employees, Elanco is committed to raising awareness about global food security and supporting the human-animal bond. Elanco - Clinton Laboratories is large scale manufacturing site that employs microbiologists, analytical and organic chemists, biochemists, and engineers. For the 2020- 2021 recruiting season, Clinton is looking to discover top talent for our summer internship program, full-time scientist positions, and full-time engineer positions. Through root cause investigations, cross-functional collaboration, and process optimization initiatives, Elanco's scientists and engineers use their knowledge and technical training to improve the manufacturing process while ensuring the effectiveness and safety of our products.
