

## **Campus Grilling Safety Guidelines**

- Grilling event organizers are responsible for implementing all fire safety procedures to ensure personal safety and property conservation.
- Public Safety should be notified of the event at least 1 hour prior to the grilling event.
- Charcoal grills may only be used out of doors, at least 30 feet from any building, structure or combustible surface, to prevent introducing smoke into building smoke detectors.
- Grills should be located away from low-hanging trees, on an accessible, level surface free of combustible material of any kind.
- Cooking devices must be constantly attended for the duration of the grilling event.
- Charcoal grills may not be used in high wind conditions.
- Fuel other than Charcoal is strictly prohibited.
- Charcoal lighter fluid is the only accelerant which may be used, and should be handled with extreme caution.
