The Treaty of Versailles, which ended the Great War (World War I) between Germany and the Allied Powers was signed one hundred years ago this June. Yet the Treaty is not just a historical event. It is a moment that continues to influence our world today.

William Faulkner once wrote that “The past is never dead. It’s not even past.” The Treaty of Versailles is a testament to this truth. It is a reminder of the consequences of war and the importance of peace. It is a lesson that we must learn if we are to avoid future conflicts.

Fortunately, the world has made significant strides since the signing of the Treaty. We have seen the rise of nations and the fall of empires. We have witnessed technological advancements and scientific breakthroughs. We have seen the rise of globalization and the decline of isolationism. Yet, despite these changes, the world still faces many challenges.

One of the most pressing issues is climate change. The Treaty of Versailles was signed in the midst of a roaring twenties, a time of great prosperity and growth. Yet, it was also a time of environmental degradation. The world has not learned the lesson of the Treaty. We continue to exploit the earth and its resources, ignoring the consequences of our actions.

The Office of Sustainability at Indiana State University is working to address this issue. They are working with students, faculty, and staff to reduce the university’s carbon footprint and promote sustainability. They are also working to educate the public about the importance of sustainable practices.

Another challenge that the world faces is the rise of populism. The Treaty of Versailles was signed in the wake of a great war. It was a time of great uncertainty and fear. The world has not learned the lesson of the Treaty. We continue to see the rise of populism, a movement that is characterized by a rejection of established institutions and a desire for change.

The Office of Sustainability at Indiana State University is working to address this issue as well. They are working with students, faculty, and staff to promote engagement and critical thinking. They are also working to educate the public about the importance of participation in democratic processes.

Finally, the Office of Sustainability is working to address the issue of sustainability in the arts. They are working with the Office of the Vice President for University Engagement to promote sustainability in the arts. They are working with the Office of the Vice President for University Engagement to promote sustainability in the arts. They are working with the Office of the Vice President for University Engagement to promote sustainability in the arts.

The Office of Sustainability at Indiana State University is working to address these issues and many more. They are working to promote sustainability, engage students, and create a more sustainable world.

To learn more about the Office of Sustainability, please visit their website. You can also follow them on social media to stay up to date with the latest news and events.

OSHER Lifelong Learning Institute of Indiana State University
RSVP May 10, 2019
Time: 6 - 8 PM
Date: Tuesday, May 28, 2019
