| analysis, criterion          |                 |                           |             |                           |                        |
| referenced measurement,      |                 |                           |             |                           |                        |
| formative and summative      |                 |                           |             |                           |                        |
| evaluation, and long-range   |                 |                           |             |                           |                        |
| planning                     |                 |                           |             |                           |                        |

# **Student Success Activities**

Use the "Academic Chair" tab in <u>Blue Reports</u> to view your program's data related to retention, persistence, time to/rates of graduation, etc., as applicable (undergraduate v. graduate). Share reflections and activities of program faculty in the table below. Consider curricular, pedagogical, advising, co-curricular, and student support efforts.

| Describe current student success activities that are working well. | Consistent communication with students has been the most effective strategy for         |  |
|--|---|--|
|  | tracking student progress and supporting students in their program completion efforts.  |  |
| Based on Blue Reports data and review of current activities, what  | As this program is phased out, our focus will be on consistent and timely advising that |  |
| are the primary areas to focus on improving next year?             | promotes semester-to-semester retention and program completion.                         |  |

If you don't have a Blue Reports account, you can request one using the webpage link, or your Department Chair, Associate Dean, or College Assessment Director can assist you.

## **Continuous Quality Improvement**

| Describe primary insights gained from analysis of findings.<br>What was learned? What questions did it raise? How does current<br>performance compare to past (if applicable), and how might any prior<br>action plans have influenced performance? | Over the past year, a number of students have not completed or not continued their<br>enrollment in this program, and a number of students have registered for courses but have<br>not completed the work or withdrawn. It seems likely that delivering courses using<br>primarily adjunct instructors, coupled with changes in program leadership, have detracted<br>from the student experience and the ability of the department to proactively support<br>student success.  |
|---|---|
| What findings-based actions are planned to maintain strong performance and/or improve student learning and success?   | This program is being phased out due to loss of qualified faculty to deliver coursework. Dr.<br>Carrie Ball has assumed program coordination responsibilities during the phase-out period.<br>Planned strategies to support student success this year include timely and consistent<br>communication about course registration and programs of study, increased efforts to help<br>students identify opportunities for their culminating experience, and reaching out to<br>adjunct faculty periodically to monitor student progress. |
| What learning outcomes will your assessment plan focus on next<br>year, and what changes, if any, are planned to improve<br>assessment strategies and yield stronger data?  | Next year we will return to assessment of Standards 1 (Design) and 3 (Utilization); we will continue to monitor Standard 5 (Evaluation). Because this program is being discontinued, we plan to continue with existing assessment strategies.   |

| Describe faculty involvement in this assessment, and how will | These results will be shared with faculty who deliver these courses, including our regular |
|---|--|
| findings be shared with faculty/stakeholders (as applicable)? | adjunct instructors. We hope this will help our partners closely monitor student progress  |
|   | and alert the program coordinator about concerns in a timely manner.                       |

Office of Assessment and Accreditation

# Student Outcomes Assessment & Success Report Evaluation AY 21-22

# Program: MS Educational Technology Evaluation: Developing

The purpose of SOAS Report evaluation is to promote high quality academic program assessment that results in relevant, useful, and accurate data about student learning outcome achievement that faculty can use in planning for and monitoring efforts toward continuous improvement. Faculty are encouraged to incorporate feedback they find useful into assessment practices, and resources are available to support assessment development.

**Evaluation Key:** <u>Exemplary</u>=Meets all standards, exceeds some; <u>Mature</u>=Meets all/most standards, no serious concerns; <u>Developing</u>=Meets some standards, multiple recommendations for improvement; <u>Undeveloped</u>=Meets few/no standards, serious concerns noted; <u>Cannot Evaluate</u>=Missing information prevents evaluation

| Component of<br>Practice  | Areas of Exemplary Practice  | Standards of Practice<br>Highlighted practices were clear in the SOASR   | Recommendations for<br>Improvement<br>(serious concerns highlighted)   | Evaluation<br>Relative to<br>Standards |
|---|--|--|--|--|
| Learning<br>Outcomes<br>Strong learning<br>outcomes use<br>language that<br>focuses on what<br>students will achieve<br>and can be measured<br>to demonstrate<br>achievement.   |  | At least one outcome is assessed this cycle<br>Outcome(s) is specific as to what students will be able to<br>know/do as a result of their learning<br>Outcome(s) is measurable<br>Outcome(s) is consistent across modes of delivery (if<br>applicable)   | LO language is highly complex,<br>which is okay so long as measures<br>and evaluative tools mirror that<br>complexity.   | Mature                                 |
| Assessment<br>Strategies<br>Strong assessment<br>strategies are<br>designed to produce<br>data of high enough<br>quality to be useful<br>to faculty trying to<br>understanding<br>student learning<br>outcome<br>achievement,<br>uncover potential<br>issues, and<br>determine next steps<br>to support<br>continuous<br>improvement. They<br>do not rise to the<br>rigor of research<br>methods, though<br>they may draw on<br>some related tenants<br>and strategies. | Good use of multiple points of data<br>for each LO to provide various<br>perspectives on student learning<br>from across the curriculum. | Assessment measure(s) is designed for precise alignment<br>to designated outcome(s) – <i>in some cases, see notes</i><br>Overall assessment strategy relies primarily on direct<br>assessment measure(s)<br>Indirect assessment measure(s) is included to provide<br>supplemental perspectives<br>Assessment data comes from multiple sources, either<br>within a significant course or across the curriculum<br>Assessment measures include rich and/or relevant displays<br>of student learning (i.e. experiential learning, intensive<br>writing, problem-based learning, licensure exams, etc.)<br>Tools for evaluating student achievement are clearly<br>described when necessary (i.e. rubrics, exam alignment<br>key, preceptor evaluation, etc.) – <i>to an extent, see notes</i> | Course grades are not a particularly<br>helpful assessment data point, as they<br>often are composites of many<br>performances. If being used as an<br>indirect measure, they can provide<br>useful reference points for distance<br>between LO mastery and course<br>grades to recalibrate grading<br>structure, if necessary.<br>Rubrics are helpful tools, especially<br>when complex LOs such as these are<br>involved; however, because student<br>data reflects the same scores on<br>assignments across multiple LOs, it is<br>questionable whether these rubrics<br>are using data disaggregated by LO to<br>precisely target the LOs independently<br>of each other. An analytical rubric will<br>allow for this and provide much more<br>accurate data. It could be this is<br>what's happening, and the score<br>consistency was not a concern. | Developing                             |

| Results &              | The threshold for proficiency for each outcome is clearly      | Mature      |      |
|------------------------|--|-------------|------|
| Analysis               | stated relative to the measure/evaluation tool used            |             |      |
| Clear depiction of     |  |             |      |
| results and strong     | The threshold for proficiency reflects reasonably high         |             |      |
| analysis pairs with    | expectations for the program                                   |             |      |
| strong assessment      |  |             |      |
| strategies to allow    | Actual student performance data on assessment measures         |             |      |
| faculty to determine   | is shared relative to the stated threshold for proficiency     |             |      |
| appropriate            |  |             |      |
| interpretation of      | and (when applicable) the evaluation tool used                 |             |      |
| data and use of        |  |             |      |
| findings. Use of       | Thoughtful discussion of faculty insights gained from          |             |      |
| student achievement    | findings is included   |             |      |
| data rather than       |  |             |      |
| anecdotes,             | When appropriate, student performance data is                  |             |      |
| comparison to          | disaggregated by group, without identifying any specific       |             |      |
| thresholds of          | student (ex: on-campus & distance cohorts in a program         |             |      |
| proficiency, and       | offering both forms of delivery)                               |             |      |
| thoughtful use of      | offering both forms of delivery)                               |             |      |
| disaggregation to      |  |             |      |
| uncover potential      | When applicable, missing data or significant limitations to    |             |      |
| group differences      | how data may be interpreted or applied are described           |             |      |
