

2015 Curriculum Map Final

Courses and Activities Mapped to PSD in Clinical Psychology - Outcome Set (Effective 2014-2015)

| Goal 1: To produce professional psychologists who understand and apply scientific knowledge and principals | | Goal 2: To produce graduates who are effective and competent clinicians. | | | | | Goal 3: To prepare graduates to contribute to the field of psychology in the practitioner-scientist tradition | |
|---|--|---|---|--|--|---|--|---|
| <p>1.1 Knowledge of core areas of psychology Students will acquire knowledge of core areas of psychology</p> <p>1. Demonstrate knowledge in the broad theoretical and scientific foundations of the field of psychology including biological, cognitive, affective, and social aspects of behavior.</p> | <p>1.2 Scientific methodology and measurement Students will acquire knowledge and skills needed to integrate scientific methodology and psychological measurement into clinical practice.</p> <p>1.2.1 Demonstrate knowledge of statistics and research design</p> | <p>2.1 Competence in assessment and diagnosis Students will acquire knowledge, skill and supporting attitudes for competence in assessment and diagnosis.</p> | <p>2.2 Treat a range of mental health issues 2.2.1 Students will gain knowledge, ability and supporting attitudes to treat a range of mental health and adjustment issues.</p> <p>2.2.2 Demonstrate knowledge and ability to evaluate client progress and treatment outcomes.</p> | <p>2.3 Ethical and professional conduct 2.3.1 Demonstrate knowledge of ethical/professional codes, standards and guidelines 2.3.2. Demonstrate ability to recognize and analyze ethical and legal issues across the range of professional activities.</p> | <p>2.4 Diversity Competence 2.4.1 Demonstrate competence in issues related to diversity across professional settings and activities.</p> | <p>2.5 Supervision and consultation Students will gain foundational knowledge and skills in supervision, and consultation</p> <p>2.5.1 Demonstrate understanding of key concepts and processes of supervision and consultation 2.5.2. Demonstrate basic skills in supervision.</p> | <p>3.1 Produce practicing psychologists and contributors to the profession To produce graduates who identify as practicing psychologists and contribute to the profession.</p> <p>3.1.1 Graduates will have knowledge and skills needed for professional practice. 3,1,2 Graduate will contribute to the field through professional activities.</p> | <p>3.2 Graduates engage in life-long learning To produce graduates who engage in life-long learning.</p> <p>3.2.1 Graduates will demonstrate commitment to continued professional developmental</p> |
