BS in AET Outcome Set - May 2013

1. Technical Competency
Technical proficiency by applying disciplinary reasoning and critical thinking to identify, analyze and solve problems in the design, manufacture, and maintenance of major automotive subsystems and technologies (Technical Competency).

Outcome | Mapping
--- | ---
1.1: Reasonably evaluate major automotive subsystems and technologies | No Mapping
The ability to reasonably evaluate the design, manufacture, and maintenance of major automotive subsystems and technologies.

1.2: Competence in the application of computer technologies | No Mapping
Competence in the application of computer technologies commonly used in industry, governmental service, and private practice associated with automotive engineering technology.

1.3: The ability to apply principles of mathematics, science, and engineering technology | Foundational Studies: IIIa. Quantitative Literacy
The ability to apply principles of mathematics, science, engineering technology, including probability and statistics to the solution of problems related to the automotive industry.

1.4: Ability to conduct and evaluate experiments | No Mapping
The ability to conduct and evaluate experiments competently in a laboratory setting.

2. Managerial Competency
Managerial competency in the chosen field (Managerial Competency).

Outcome | Mapping
--- | ---
2.1: The ability to apply modern and effective management skills | No Mapping
The ability to apply modern and effective management skills in identification and investigation of problems, analysis of data, synthesis and implementation of solutions, and operations of automotive facilities.

3. Communication Competency
Effective communication skills in both oral and written form to articulate technical knowledge, ideas, and proposals (Communication Competency).

Outcome | Mapping
--- | ---
3.1: The ability to communicate with clarity and conciseness | Foundational Studies: 10. Express themselves effectively, professionally, and persuasively both orally and in writing.
The ability to communicate with clarity and conciseness both verbally and in writing with peers, clients and targeted audience.

4. Responsibility Awareness
The awareness of professional, ethical and social responsibility and impact of engineering technology practices in Indiana and a diversified world (Responsibility Awareness).

Outcome | Mapping
4.1: The understanding of professional and ethical responsibility,
The understanding of professional and ethical responsibility, and the impact of technology in a global and social context.

5. Teamwork Competency
The ability to function effectively, think independently and work collaboratively in a team environment (Teamwork Competency).

Outcome Mapping
5.1: Team structure and function effectively in a multi-disciplinary team
The ability to analyze team structure and function effectively in a multi-disciplinary team and respect members of various background and personality.

6. Lifelong Learning Competency
Individual desire and commitment to remain technically current by engaging in continuous self-improvement and lifelong learning (Lifelong Learning Competency).

Outcome Mapping
6.1: Desire to engage in life-long learning
Desire to engage in life-long learning to pursue increasing knowledge of current and emerging technical and non-technical issues.
