Utilize Open Educational Resources (OER)

OERs are resources that have been released to the Public Domain or are licensed under Creative Commons. **Public Domain** content can be used and modified in any way for any purpose, while **Creative Commons**-licensed materials are limited in their use based on their license. Just because a resource is "open" does not mean there are no restrictions. It is important to identify and abide by the limitations of each OER.

**Public Domain Citation**
"Title of the Work" by the Author has been released to **Public Domain**.

**Creative Commons Citation**
"Title of the Work" by the Author is licensed under **CC License Type**.

Understand Fair Use

Under Fair Use, copyrighted material can be used under certain circumstances. However, all four factors of Fair Use must be considered prior to implementation.

**Factors of Fair Use**
1. The Purpose
2. The Nature
3. The Amount and Substantiality
4. The Effect

**Example: Can I post chapter 1 of a textbook in a course?**
1. Will it serve a nonprofit or educational purpose?
2. Was the book published? Is it factual?
3. What amount is being used in relation to the entire book and is that portion considered the heart of the work?
4. Will posting this deprive the author of income or the potential for a new market?

**Fair Use Citation:** "Title of the Work" by the Author, used under Fair Use.
