Osher Lifelong Learning Institute is a forum for adults of all academic and economic backgrounds to learn about a wide variety of subjects they find interesting and engaging. It is made possible by the substantial support of the Bernard Osher Foundation and Indiana State University that the Institute can offer these unique learning opportunities to residents of the Wabash Valley.

Who are OLLI at ISU Members?
Our members come from many different backgrounds with one common purpose: they all want to learn. What each member wants to learn differs, of course, which is why OLLI offers an enormous range of topics. But all of the learning takes place in a setting that has no pressure. That is without tests, grades, and prerequisites. Also, there is no homework and every aspect of participation is voluntary! In addition, wherever members get together – in classes, for special events, or at weekly presentations—they can meet new people, enjoy casual conversations, and share their experiences and opinions.

Membership
Best of all, as one member said, “The price is right!” Membership is $40 for one year (September through August) or $20 per semester: Fall (Sept. – Dec.), Winter (Jan. – April), Summer (May – August). Included with OLLI membership are all of the presentations and one course each semester. The cost of special events and additional courses varies. (See “Membership Benefits” for more details.)

Membership Benefits
When you join OLLI, you
• Become a part of a vibrant community of engaged and engaging members.
• Can attend weekly, one-hour presentations on a wide range of topics from serious to the humorous and from the vital to the frivolous. (All of these presentations are included with membership.)
• Are able to participate in local and regional day trips that explore our area’s history and natural beauty. In addition, members receive early notice of longer trips in the United States and abroad. (These trips usually have additional fees.)
• Receive weekly e-mail announcements and reminders about OLLI programs as well as community events and ISU programs.
• Have access to non-credit courses (either full semester or short courses) taught by community experts as well as faculty from Indiana State, Rose-Hulman and St. Mary-of-the-Woods. The topics are often suggested by the members and include the arts, sciences, history, technology, religion, writing, local and global issues – to name only a few!

For the winter semester members receive one free course from the list below. To take advantage of this benefit, use the registration form on pages 45-46 of this guide or call the OLLI office at ISU at 812-237-9040.

Members’ Views of OLLI

I’m so glad I joined OLLI. I loved seeing the national Russian ballet performance of Snow White and attending the True Crime class has been excellent. I’d encourage anyone looking for something new to do to join.

- Linda Yates

OLLI presents one good Wednesday program after another. However, I do think Ruth Fairbanks’ presentation on her Fulbright experience in Norway was one of the very best. In addition, the cultural and political differences between our country and Norway were emphasized even more by the OLLI programs on local homelessness.

- Dorothy Jerse

Once again the OLLI International Perspectives class provided great insights into the lives and cultures of the students who presented. This was a very valuable experience for all involved! In addition, the trip to the Sycamore Winery was quite enjoyable. We not only had an informative tour of the beautiful facility, but were able to savor a variety of the delicious wines produced there. Looking forward to more offerings in the coming months: Hamilton, Peter and the Wolf, and Midtown Men, to name a few. There are always so many opportunities for involvement!

- Janet Higgins-Jerry

I just want to say that the two-week OLLI course on The Twilight Zone was both interesting and fun. Of course, Mike Lunsford is an excellent presenter. He also gave us some other sources to check out for information. I give him an A plus!

Why OLLI Members Give

“Donating to OLLI is like making a sound investment in my own future, as well as a way of saying, ‘thank you’ for the wide variety of experiences OLLI continually offers. OLLI has become an amazing part of my life.” — Judy H.

“OLLI is a shining light in my life. Attend just one class and you’ll see what I mean. I give because OLLI has earned my support many times over.”—Richard W.

The OLLI Annual Fund – Why Is It Needed?
Membership fees cover only a portion of the amount OLLI needs to operate. Your contribution means that yearly membership dues can be kept low as we continue to bring you the high-quality educational program you’ve come to expect from OLLI. The annual fund accounts for 7% of the overall budget, and plays an important role in keeping the budget in balance. In addition, it meets a key requirement of our endowment from the Bernard Osher Foundation that we engage in fund-raising efforts each year.

The Perfect Time to Give
Our heartfelt thanks to all of you who have given so generously in response to our fall 2018 donation letter. For those still considering a gift, we would like to challenge you to make the same investment in our institute that the Osher Foundation and other OLLI members have done by asking you to contribute to the institute that has become a large part of the lives of individuals in our community. Our goal is to raise $20,000 by August 1, 2019 with fifty percent of our membership contributing. As of right now we have raised $9,519 with twenty-five percent of the membership having already contributed.

Genetics in Cancer with Catherine Steding
Understanding cancer initiation and progression remains of extreme clinical significance as it is estimated that nearly 1.7 million people in the United States will be diagnosed with cancer this year alone. These staggering statistics demonstrate the ever-pressing need for improved education in cancer as well as renewed investigation in therapeutics. Time: 2 - 4 PM
Place: ISU, College of Nursing Room 107
Cost: $20 (includes book “Wicked Terre Haute”)

This three-session class will look at the history of vice in Terre Haute. Classes will focus on prostitution, bootlegging, gambling and gangsterism. The famous Madam Edith Brown shared the streets with Al Capone, the Dillinger gang, bootleggers and gamblers. This course will tell their stories.

The book by Tim Crumrin titled “Wicked Terre Haute” will be used as a textbook for this class and is included in the price of the class. It will be handed out the first day of class.
The heart is the first functional organ to develop in humans, while cardiovascular diseases are the leading causes of deaths worldwide. Understanding the microbial disease mechanisms or genetic and molecular defects in cardiovascular diseases is thus a pressing reason to aim for a comprehensive analysis of heart development. Cardiogenesis, the development of the heart, is controlled by a complex regulatory network of genes. Multiple approaches have been used to study cardiogenesis, including genetic and gene expression analysis with healthy and diseased individuals. In this course, we will discuss some of our current knowledge of heart development and disease, and explore some of the experimental tools and approaches used to acquire this knowledge.

Great Decisions is produced by the Foreign Policy Association and involves reading an article and meeting in a discussion group setting, lead by Mike Chambers, to discuss the issues. The topics to be discussed are below.

**Decoding U.S.-China Trade**
Though arguably the most advanced economy in the world, the United States still uses centuries-old numbers to measure trade. These antique numbers mangle understanding of the U.S.-China trade relationship, shrinking America’s true economic size and competitiveness, while swelling China’s. Bad numbers give rise to bad policies that ultimately kill U.S. jobs and cede market share to China. What other tools can the United States employ to counter China’s unfair trade practices?

**Nuclear Negotiations: Back to the Future?**
Nuclear weapons have not gone away, and the Trump administration has brought a new urgency, if not a new approach, to dealing with them. The President has met with Vladimir Putin as the New Start Treaty with Russia comes up for renewal in 2021, the first presidential summit ever with Kim Jong-un occurred to discuss denuclearizing the Korean Peninsula, and President Trump has decertified the Obama nuclear deal with Iran. To what degree should past nuclear talks guide future U.S. nuclear arms control negotiations? Can the art of the deal apply to stabilizing our nuclear future?
This Changes Everything:
Capitalism vs. Climate
With Nicholas McCreary, ISU Sustainability Coordinator

Date: Tuesdays, July 9, 16, 23, & 30, 2019
Time: 2 - 4 PM
Place: ISU, University Hall Room 313
Cost: $20 (Book not included in price)

Join in a discussion on the book “This Changes Everything: Capitalism vs. Climate” by Naomi Klein. Forget everything you think you know about global warming. The really inconvenient truth is that it’s not about carbon—it’s about capitalism. The convenient truth is that we can seize this existential crisis to transform our failed economic system and build something radically better. Klein exposes the myths that are clouding the climate debate.

Beyond Recycling
With Nicholas McCreary, ISU Sustainability Coordinator

Help support OLLI at ISU by enjoying a night of World War I history with Don Layton as he helps us understand how the signing of The Treaty of Versailles impacted not only our past but our present day. Because the treaty was signed at Versailles our food for the evening will be French and hand picked by Martha Layton. Don and Martha Layton are not just members of OLLI but are prominent people in our community. Don was one of the most beloved faculty at Indiana State University, while Martha was a cherished French teacher at Terre Haute North High School.

The Treaty of Versailles
William Faulkner once wrote that “The past is never dead. It’s not even past.” The Treaty of Versailles, which ended the Great War (World War I) between Germany and the Allied Powers was signed one hundred years ago this June. Yet the Treaty is inexorably linked to the present day world and is the source of many of its problems. This lecture will discuss that Treaty, with particular emphasis on these links and the problems which resulted from them.

A portion of your registration which exceeds the value of the dinner will be tax deductible.

What a beautiful setting for a hideous crime! On March 14, 1960, three women set off on a hike at Starved Rock State Park. When they failed to return to the lodge by the next day, a search was organized and soon their badly beaten bodies were found in a small cave within a canyon.

The investigation that followed led to the arrest and conviction of Chester Weger in 1961. Chester Weger, who is still serving his life sentence in connection with the three murders, was denied parole in 2018. Weger, 77, is Illinois’ third-longest-held inmate in a state prison.

Come learn about different aspects of the case from the book written about the murders, to documentaries being made, and news articles from just last year talking about Weger still being denied parole after all these years.

**Terre Haute: Rise & Resilience**

*Terre Haute: Rise & Resilience* is a story of the American experience. This program takes viewers through the history of Terre Haute, starting with its French colonial origin. Terre Haute played host to some of the key players in the War of 1812, including William Henry Harrison, Zachary Taylor and the Native American Chief Tecumseh. During peacetime, the city was founded by wealthy investors, and its prime location eventually turned it into one of the “gateways to the west.”

Terre Haute flourished as a boomtown during the nation’s Westward expansion. The city gained national standing during the Industrial Age due to its status as a major transportation hub, bringing great prosperity and establishing it as a key player in the industrial revolution. It was the birthplace of the famous socialist and labor movement activist Eugene V. Debs, composer Paul Dresser, writer Theodore Dreiser, and poet Max Ehrmann.

Terre Haute today is a typical Midwestern city whose star has long since faded as the city has struggled to keep up with changing times. At one time “Crossroads of America,” the city lost that significance with the advent of the interstate road system. Terre Haute has survived bouts of political corruption, labor unrest, and hard-hitting economic setbacks, but remains resilient.

**Shakespeare's Romeo and Juliet**
*With Tom Sauer, ISU Dean Emeritus of Arts and Sciences*

**Time:** 2 - 4 PM

The most famous love story in world literature for over 400 years, a longstanding staple of the American high school English curriculum, the inspiration for Leonard Bernstein’s musical *West Side Story*, and popular film versions by Franco Zeffirelli (1968) and Baz Luhrmann (1996), Shakespeare’s *Romeo and Juliet* surely needs no introduction for OLLI members. Instead of an introduction, we will offer a “refresher” class on the play in preparation of OLLI attending the play of *Romeo and Juliet* by ISU’s Crossroads Repertory Theatre on June 28 (see page 24 for details). The class will include close reading of selected passages and discussion of the plot, dramatic and poetic structure, imagery, characterization, and themes in the play, as well as an historical overview of its influence in literature and the other arts including its inspiration for the film *Shakespeare in Love* (1998). In the “two-hours’ traffic” of our class, we will together revisit what Harold Bloom calls “the largest and most persuasive celebration of romantic love in Western literature.”
