

AETM Budget Committee

The following defines the composition of the AETM Budget Committee.

- The Committee shall be comprised of at least three Department faculty members.
- Each of these three shall play a major role in a different undergraduate baccalaureate program, e.g., be the lead faculty for that program and/or their teaching load is mainly in that program. Though all committee members represent the Department, the intent is that the committee has program diversity.
- At least two committee members will teach laboratory courses.

The Committee's responsibilities include advising the Department Chair about all budgetary issues, e.g., evaluating or ranking new equipment or repair requests, making recommendations about course fees, or providing advice or proposing a policy concerning faculty travel funds.
