

Packaging Engineering Technology

AETM Department

Description of major: The Packaging Engineering Technology program combines classroom learning with hands-on experiences. Students explore the technical use of equipment to learn design techniques and to gain an understanding of management practices. The program offers a number of options for specialization, from manufacturing and mechanical technology to graphic and design.

Math Requirement

Calculus I

Science Requirement

Physics I
Chemistry I

Hands on/Lab Based: Yes, students have the opportunity to perform industry projects inside the Indiana Packaging R&D Center located on-campus.

Theoretical/Analytical: Students are required to perform packaging testing to ensure performance of their designs.

Accreditation: Higher Learning Commission and Engineering Technology Accreditation Commission of ABET

Popular Jobs Associated: Packaging Engineer, Lab Technician, Quality Engineer

Salary Range: \$55,000 - \$75,000
